

ETECH GROWING: ORLANDO OFFICE MOVES TO BIGGER FACILITY -September 2009-

While others in the industry are down-sizing, **etech** is steadily on the rise. The company just upgraded its Orlando facility to a brand new 14,400 square foot facility, which significantly increased corporate warehouse and office space and will enable the **etech** team to maximize efficiency, balance overhead, and significantly increase capacity.

Taking advantage of great deals in the down market, **etech** Founder/CEO Tom Brandt says, "The time was ripe to make a strategic move for growth. We're optimistic about the future demand for our services and making the move now lets us increase space while optimizing our long term costs."

The new facility is conveniently located close to Orlando International Airport at 1629 Prime Court, Ste. 100, Orlando, FL 32809.
