

## **ETECH BEHIND THE SCENES AT BLACKBERRY'S WES 2009 EVENT -May 2009-**

For the fifth year in a row, industry leader **etech** provided seamless event technology services and project management support at the annual Wireless Enterprise Symposium (WES) hosted by Research in Motion at the World Marriot Hotel in Orlando, FL. At this year's event, **etech**, worked behind the scenes providing audio visual, presentation, and hi-speed internet services to accommodate the highly complicated technology needs of thousands of event attendees and presenters.

"We always look forward to WES," says **etech** founder and CEO/President Tom Brandt. "This was our fifth year working the event and it's one of our most challenging and exciting projects each year. As the size and scope of the event has grown significantly over the years, so have our capabilities and accomplishments."

The high-profile WES event, considered Blackberry's largest international event each year, draws thousands of global attendees and offers a wealth of breakout sessions, peer case studies, hands-on labs, an impressive Solutions Showcase, networking events, and remarkable keynote speakers. **etech** was honored to be selected as of this dynamic event team and looks forward to returning again next year.
